

Fluid Power Technician

Employee owned and well-established company of over 80 years is seeking a skilled Fluid Power Technician for our Muskego facility. Grimstad is a single-source fluid power distributor and control systems provider who designs, develops, and tests our systems to meet customer exacting needs and specifications. We are experts in designing systems that make machines and mobile equipment push, pull, lift, and lower. We serve a variety of industries including mining, construction, defense, pulp and paper and railroad maintenance.

Primary duties will be to assemble and test fluid power equipment including, power units, pneumatic panels, and manifold assemblies. Attention to detail is key in this role.

We offer an outstanding benefits package including:

- Paid Time Off –3 weeks PTO (with additional days given based on service years)
- Holidays – 10 paid holidays per calendar year
- ESOP – tax deferred retirement plan fully paid for by the company
- 401k – includes a generous employer match
- Health, Dental and Vision insurance – with 4-tier options and coverage beginning on the first of the month following employment
- Health Reimbursement Account – company reimburses up to \$2500 (single) or \$5000 (family) each year
- Health Savings Account
- Flexible Spending Account
- Life Insurance – 1x annual salary fully paid for by the company
- Long-term Disability - coverage is at 60% of your income and is fully paid for by the company
- Voluntary Life insurance – available for self, spouse, or children
- Educational Assistance – for personal growth and development in a degree program
- Paid Training – to enhance technical and soft skills
- Voluntary benefits – available for coverages including accident, cancer, critical illness and short-term disability
